PROFILE

Data & BI Analyst with 3+ years bridging finance, operations and analytics. **Built the management analytics function from scratch** in a 40+ person business and own the path from metric logic and data quality to PostgreSQL/Python pipelines and Power BI decision tools.

CAREER FOCUS

Data / Product Analytics in product companies. Long term: analytics leadership.

EXPERIENCE

Oct 2023 – Present

Miller Law Firm

Kyiv, Ukraine

BI & Data Analyst (Finance Manager)

- Built the company's management analytics function from scratch for a 40+ person firm, owning metric definitions, reporting logic, data quality and the KPIs used by management.
- Replaced manual Excel reporting with PostgreSQL, Python, Power BI and Azure, cutting the recurring cycle from ~10 hours to ~10 minutes and eliminating ~120 hours of manual work annually.
- Built profitability and workforce analytics for client margin, realization, utilization and capacity, giving management self-service access to a consistent set of management KPIs.
- Automated client reporting, pricing and margin tools and data-quality controls via Worksection and FinMap APIs; led business-side requirements for an Odoo CRM implementation.

Dec 2022 – Sep 2023

Ukrposhta JSC

Kyiv, Ukraine

Planning Economist

- Supported budgeting, cost analysis and P&L / operational reporting; prepared contractor cost calculations and verified source data in IT-Enterprise.
